

is proud to be an active participant in
Responsible Care[®]
Partnership Program

As a Partner in the Chemical Manufacturers Association's Responsible Care[®] initiative, we are committed to support a continuing industry effort to improve the industry's responsible management of chemicals. We pledge to manage our business according to these principles:

- ◆ To recognize and respond to community concerns about chemicals and our operations.
- ◆ To develop and produce chemicals that can be manufactured, transported, used, and disposed of safely.
- ◆ To make health, safety, and environmental considerations a priority in our planning for all existing and new products and processes.
- ◆ To report promptly to officials, employees, customers, and the public, information on chemical-related health or environmental hazards and to recommend protective measures.
- ◆ To counsel customers on the safe use, transportation and disposal of chemical products.
- ◆ To operate our plants and facilities in a manner that protects the environment and the safety of our employees and the public.
- ◆ To extend knowledge by conducting or supporting research on the health, safety, and environmental effects of our products, processes and waste materials.
- ◆ To work with others to resolve problems created by past handling and disposal of hazardous substances.
- ◆ To work with government and others in creating responsible laws, regulations, and standards to safeguard the community, workplace, and environment.
- ◆ To promote the principles and practices of Responsible Care[®] by sharing experiences and offering assistance to others who produce, handle, use, transport, or dispose of chemicals.
